

18th ANDROLOGY COURSE

Reproductive health. Sexual health. Men's health

18th ANDROLOGY COURSE

Reproductive health. Sexual health. Men's health

Dear friends,

On behalf of **Fundació Puigvert** I would like to invite you to our **18th Course on Andrology and Sexual, Reproductive and Men's Health**.

In accordance with the mission of our institutional courses, held every 3 years, our aim is to offer an update in Andrology, in the areas of both Sexual and Reproductive Medicine. For this purpose, we will be counting on the participation of leading national and international specialists, together with members of the Andrology Department of Fundació Puigvert and specialists from other Departments in the institution with whom we work on a day-to-day basis.

This edition of the course is very special to us as it is being held in conjunction with the **12th European Congress of Andrology**, the organisation of which has been awarded to the Andrology Department of Fundació Puigvert by the European Academy of Andrology (ECA). The Congress will include more than 70 high-level invited faculty and involve the participation of prominent members of the ESAU, ISA, ESE, ESGURS, ESSM and ASESA¹ as well as the Presidents of European Andrology societies from various countries.

The endeavour is significant, but the pursuit of excellence in the transmission and exchange of knowledge is a powerful incentive.

We are counting, once again, on your help in order to achieve this objective. We look forward to meeting each other socially in person and to sharing information and views on all relevant scientific aspects.

With best regards,

E. Ruiz Castañé

Director of the Andrology Department
LOC President
POC Chair Ex-officio

¹**ESAU, EAU** - Section of Andrological Urology, **ISA** - International Society of Andrology, **ESE** - European Society of Endocrinology, **ESGURS, EAU** - Section of Genitourinary Reconstructive Surgeons, **ESSM** - European Society for Sexual Medicine, **ASESA** - Asociación Española de Andrología, Medicina Sexual y Reproductiva

MEDICAL DIRECTOR**Lluís Gausa**

Director of Healthcare and Medical Services

INVITED FACULTY**Eduard García Cruz**

Urologist. Instituto de Urología Serrate & Ribal, Barcelona and ROC Clinic, Madrid

François Peinado

Head of Urology & Andrology
Hospital Quirón Ruber. Madrid

Javier Romero - Otero

Head of Urology Department HM Hospitales and
ROC Clinic, Madrid

Nuno Tomada

Urologist and Andrologist. Hospital da
Luz. Arrábida. Porto. Portugal

Josep Torremadé

Urologist. Hospital Clinic de Barcelona and
Andrología Barcelona Tecknon

Pedro Vendeira

Urology Coordinator. Clínica
Espregueira. FIFA Medical Centre of
Excellence. Porto. Portugal

COURSE DIRECTOR**Eduard Ruiz Castañé**

Director of the Andrology department

FUNDACIÓ PUIGVERT FACULTY**Alberto Breda**

Chief of the Urology Oncology Unit and
the Renal Transplant Surgical Team

Josep M^a Gaya

Staff member of the Urology Oncology Unit

Joan Palou

Director of the Urology Department

Eduard Ruiz Castañé

Director of the Andrology Department

Francesco Sanguedolce

Staff member of the Urology Oncology Unit

Joaquim Sarquella

Staff member of the Andrology Department

Doron Vantman

Staff member of the Andrology Department

Álvaro Vives

Staff member of the Andrology Department
Coordinator of the Sexually Transmitted
Disease (STDs) Unit

PROGRAM

19th October 2022

07:45 - 08:00 h. Registration

08:00 - 09:30 h. **Andrological implications in patients with prostate cancer**

Moderators: **Joan Palou, Alberto Breda, Eduard García Cruz, Eduard Ruiz Castañé**

08:00 - 08:15 h. Tricks in the preservation of neurovascular bundles in radical surgery
Joan Palou

08:15 - 08:30 h. Sexual safety and well-being in radical prostate surgery:
pre and postoperative control
Doron Vantman

08:30 - 08:45 h. Update on hormonal treatment of prostate cancer
Josep Maria Gaya

08:45 - 09:00 h. Myths and realities in the affectation of sexual function in metastatic patients
Francesco Sanguedolce

09:00 - 09:15 h. Ejaculation and orgasm alterations in prostate cancer
Doron Vantman

09:15 - 09:30 h. Questions & Answers

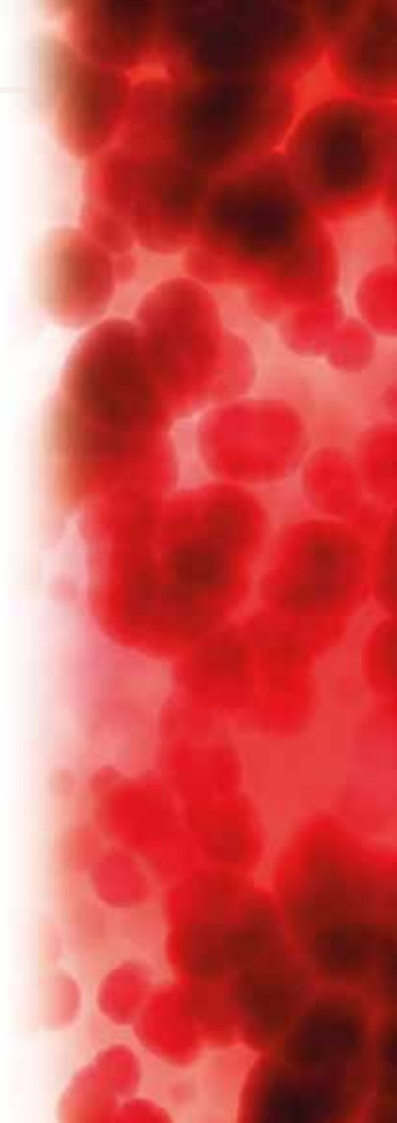

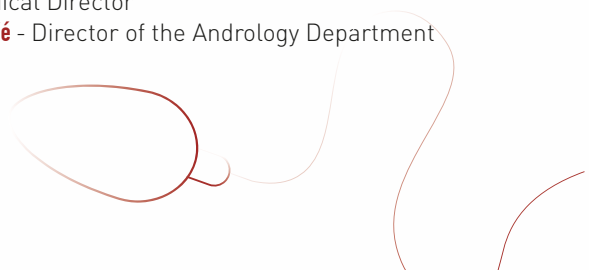

09:30 - 09:45 h. Welcome & introduction

Ramón Massaguer - Deputy trustee, General Director

Lluís Gausa - Medical Director

Eduard Ruiz Castañé - Director of the Andrology Department

09:45 - 10:05 h. Coffee break

10:05 - 11:20h. **Peyronie's disease**

Moderators: **François Peinado, Joaquim Sarquella, Eduard Ruiz Castañé**

- 10:05 - 10:20 h. How to medically manage Peyronie's disease today
Eduard García Cruz
- 10:20 - 10:35 h. Surgical management of Peyronie's disease
Joaquim Sarquella
- 10:35 - 10:50 h. Surgical management of Peyronie's disease with penile prosthesis
Javier Romero - Otero
- 10:50 - 11:05 h. Peyronie's disease in the future
François Peinado
- 11:05 - 11:20 h. Questions & Answers

11:20 - 12:35h. **Penile prosthesis**

Moderators: **Josep Torremadé, Pedro Vendeira, Doron Vantman**

- 11:20 - 11:35 h. Is there the ideal penile prosthesis?
Pedro Vendeira
- 11:35 - 11:50 h. How to choose the best prosthesis?
Nuno Tomada
- 11:50 - 12:05 h. Complication of PPI
Eduard Ruiz Castañé
- 12:05 - 12:20 h. What is the best approach for PPI?
Joaquim Sarquella
- 12:20 - 12:35 h. Questions & Answers

12:35 - 14:20h. **Surgical videos**

Moderators: Javier Romero - Otero, Joaquim Sarquella

- 12:35 - 12:47 h. 16-Dot Corporoplasty in Peyronie's disease
Joaquim Sarquella
- 12:47 - 12:59 h. The reservoir in penile prostheses
Josep Torremadé
- 12:59 - 13:11 h. Penile Prosthesis implant with Peyronie's disease
Pedro Vendeira
- 13:11 - 13:23 h. Complicate Peyronie's disease surgery
Joaquim Sarquella
- 13:23 - 13:35 h. Penile prosthesis implant. Access pathway
Nuno Tomada
- 13:35 - 13:47 h. Penile prosthesis implant in cavernous fibrosis
Javier Romero - Otero
- 13:47 - 13:59 h. Radical prostatectomy with the preservation of neurovascular bandelettes
Joan Palou
- 13:59 - 14:11 h. New tools in surgical Andrology: Circumcision with Circurer
Joaquim Sarquella
Penile prosthesis implant
- 14:11 - 14:23 h. Questions & Answers
- 14:23 - 14:30 h. Closure
Eduard Ruiz Castañé

THINK BIGGER™

AMS 700 LGX™ Penile Prosthesis

The only penile implant with cylinders
designed to expand in length and girth.

- Penile shortening is the #1 patient complaint following IPP placement¹
- With expansion up to 25% in length, the AMS 700 LGX is the only implant designed to provide patients with the opportunity to regain or maintain penile length
- Twelve-month post-implantation studies show:
 - Patients implanted with AMS 700 LGX regained a median increase of 3cm in length and 2cm in girth from baseline
 - No patient experienced shortening and mechanical complications were low (no s-deformity or cylinder aneurysm)
 - AMS 700 LGX significantly improved patient satisfaction and provided an overall penile length very close to the one obtained with a "natural" erection

CAUTION: The benefits to these devices may be offset by the risk of a life-threatening infection, urethral stricture, skin necrosis, and other complications. Read the instructions for use carefully. This material is not intended for use in France. Product available in the European Economic Area (EEA) only. Please check availability with your local sales representative or customer service. Prior to use, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions and potential adverse effects.

Indications for Use: The AMS 700™ System Inflation Penile Prosthesis product line is intended for use in the treatment of chronic, organic, male erectile dysfunction (impotence). Contraindications: The AMS 700 Series Inflation Penile Prosthesis are contraindicated in the patient that have active urogenital infections or active skin infections in the region of surgery or the AMS 700 penile prosthesis with InfillaCore™ Anti-Biofilm Surface Treatment have a known sensitivity or allergy to rifampin, streptomycin or other tetraacyclines, or patients with known or suspected latex allergy have been reported to experience this condition.

Warnings: Implantation of the device will make lateral, natural or spontaneous erections, as well as other interventional treatment options, impossible. Men with diabetes, spinal cord injuries or open sores may have an increased risk of infection associated with the implantation of a prosthesis. Failure to evaluate and promptly treat erosion may result in a substantial worsening of the condition leading to infection and loss of tissue. Inflation on an erect penis may result in penile shaft tearing, curvature, or tearing of the existing abdominal or penile incision, or infections may make surgical implantation more complicated or inoperable. If a hypersensitivity reaction develops to a device coated with InfillaCore, the penile prosthesis should be removed and the patient treated appropriately. Prosthesis Migration: Migration of the device components can occur if the cylinders are improperly sized, if the pump or the reservoir is not positioned properly, or if the tubing is torn or the device is not installed properly. InfillaCore device malfunction, failure leading to additional surgery, device migration potentially leading to exposure through the tissue, device tissue erosion, infection, unintended inflation of the device and pain/urethra.

* Following a specific post-operative protocol.
